Das Raydationstheorie nach Planck, die die
Emission und Absorption von Licht als diskontinuierliche
Prozesse beschreibt, ist ein zentraler Bestandteil der
Quantenphysik. Sie erklärt die spektrale Verteilung der
Strahlung eines schwarzen Körpers, die nicht durch die
klassische Theorie von Rayleigh-Jeans beschrieben
werden kann. Planck'sche Quanten sind die kleinsten
Energieeinheiten, die in der Natur vorkommen können.
Die Energie eines Quanten ist proportional zur Frequenz
des Lichts, was die Grundlage für die Entwicklung der
Quantenmechanik bildet.

~~Lat. 34° 30' N. Long. 101° 30' W.~~
 Lat. 34° 30' N. Long. 101° 30' W. is the location of the
 site of the old fort. The fort was built by the
 Spanish in 1763. It was destroyed by the
 British in 1781. The site is now a
 national monument.
